

PROJECT MANAGEMENT & BUDGET CONTROL

About OASN Solutions

OASN Solutions is IT technology provider in general and platform Development company specialist in Web and Mobile Applications. We identify market needs and develop state-of-the-art tools to address those needs. We focus on usability, agility and simplicity with a global vision to cover the needs of different markets.

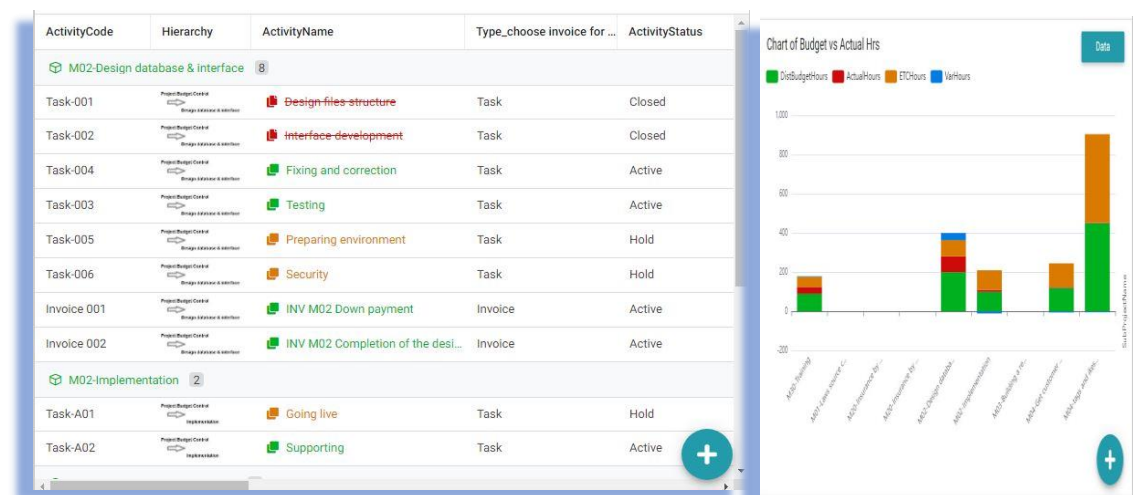

Platform

- Project management & budget control is a Web application for PM processes based on Cloud Access (no on-premises installation, servers or database)
- is accessible by browser vis Internet and Mobiles (supporting iOS and Android)
- English Language
- Zero downtime
- Credibility of Google technology and support services

V1.0

The "project management and budget control" platform is an essential tool for any organization or team looking to effectively manage their projects and finances. This platform provides a comprehensive and detailed overview of all projects and sub-projects, including information on activities, their assignments, and progress. It also keeps track of billing information, allowing for easy issuing and collection of payments.

The platform's time sheet records feature automatically updates the project's cost upon posting, ensuring accuracy and efficiency. One of the most valuable aspects of this platform is its ability to monitor the overall performance of the project, comparing the budget to actual hours and costs. This feature allows for real-time adjustments and decision-making to ensure the project stays on track and within budget.

Project Manager

The PM is the key player for making sure that the project data setup is correct, invoices dates/amounts are defined correctly. Also, the entry of the project hours through time sheet and the Direct non-labor expenses are inserted correctly and on-time.

Following up the project periodically and effectively through the available indicators represents the most important steps for the success of project execution.

Integration with other systems

- Integration with Ms-Project to import the tasks list into the platform

PMO

The most valuable aspects of this platform is its ability to monitor the overall performance of the project, comparing the budget to actual hours and costs. This feature allows for real-time adjustments and decision-making to ensure the project stays on track and within budget. With this platform, users have full financial control over their project's performance, making it an invaluable tool for successful project management.

How the PM & Budget control platform operates?

Requirement
Internet access
